PROFILE

Computer Science and Engineering student who builds full-stack systems with role-based authentication, real-time features, and relational databases. Seeking an internship to apply these skills in a production environment.

EXPERIENCE

Sports Tournament Management System

2026

| React, Node.js, Express, PostgreSQL, Prisma, Socket.IO |

- Built a tournament platform with 4 roles (Admin, Organizer, Referee, User) on 16 DB tables
- 99 REST endpoints across 19 route modules (tournaments, matches, brackets, teams)
- Role-based middleware on 30+ protected endpoints for admin actions and CRUD
- Real-time Socket.IO updates, cron automation, JWT auth, and password reset

School Management System

2025

| PHP, MySQL, HTML, CSS, JavaScript |

- Built a full-stack school portal with Admin and Student roles
- Implemented authentication, sessions, role-based access, and protected pages
- Created CRUD admin features for users, lessons, assignments, grades, attendance, and messages
- Designed a relational MySQL database for school data, submissions, schedules, and student records
